

## Huiqin Greta Hu

*A Woman, A Boundary-Breaker, and A Creative Soul*

I came from interesting places. Formally a student of [Social Sciences](#), I spent my college years studying Politics, Philosophy, and Economics in New England. After college, I moved to New York and became an [investment banker](#) on Wall Street, building spreadsheets and financial analysis day and night, while using my salary to fund indepedent films and [helping arthouse films from China to get on international stage](#) and being shown in international film festivals. And now, I'm in Silicon Valley trying to learn how to make computers sing and dance for me at [at Northeastern University](#). I don't yet know if my next 5-year-goal is to become a software engineer or a venture capitalist yet, but I'm excited about the paths in front of me.

## Education

Wesleyan University, Sept 2016 - May 2020

COLLEGE OF SOCIAL STUDIES & QUANTITATIVE ECONOMICS

Courses: Investment Finance, Corporate Finance, Philosophy, Quantitative Economics, History

Northeastern University, Sept 2022 - May 2025

MASTER OF SCIENCE, COMPUTER SCIENCE

Courses: Object-oriented design, Webdevelopment, Applications of algorithms and data structure

## Work Experience

### Capital Market Analyst at Nomura Securities International, Inc.

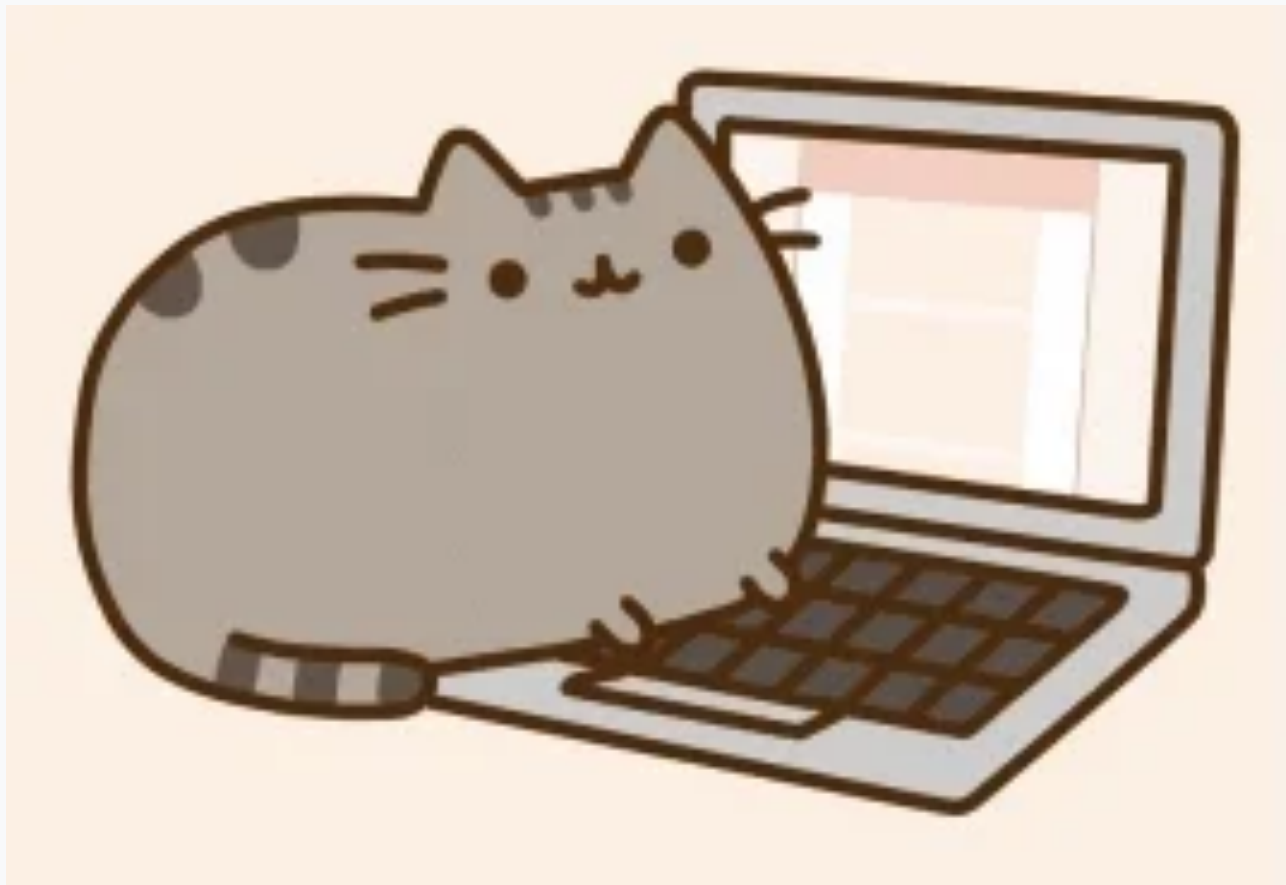

SEPT 2020 - AUG 2022, NEW YORK CITY, NY

- Researched, tracked, and evaluated 150+ financially distressed companies across industries to source potential financing opportunities using Excel and Python
- Performed credit research, legal document review, financial modeling, valuation and scenario analysis on over \$2bn debt financing deals. Worked with company advisors and CFOs to conduct due diligence

### Acquisition Consultant & Film Festival Public Relations at Midnight Blur Films

MAY 2017 - PRESENT, REMOVE

- Sourced and evaluated 100+ pre and post-production film projects from major international film festivals including Cannes and Berlinale to find suitable projects for sales in the Chinese market
- Served as the main contact person for the directors and producers of several ongoing projects; worked closely with directors and/or producers to develop detailed strategies regarding film festival publicity, press junkets design, etc
- Interviewed Chinese and international directors and talents including Jake Gyllenhaal and Ryan Reynolds for company's multi-platform media brand Deep Focus and partnership magazines

## CS Projects

### Volunteer Platform

Full stack web app that simulates epidemic distribution

- Developed a personalized volunteer event search and recommendation web application using Java for backend, and HTML, CSS, JavaScript for frontend
- Created Java servlets with RESTful APIs to handle HTTP requests to get events, save events, and get recommendations
- Designed a content-based algorithm to improve personalized event recommendation based on user's location, availability, and interested topics
- Built MySQL database to store events data from Eventbrite API, user account informations and interested topics

### Buddha Finder

Full stack website that stores data about East Asian Art

- Work in progress, I intend to use knowledge gained in this class to build an online archive for Buddhist art across the world
